ROOM SIGNAGE USING E-PAPER DISPLAY

This is our ongoing capstone project, which aims to display information about scheduled classes per classroom using an E-Paper display with the use of our website. My tasks on this project include coding for the E-Paper display and designing the interface for the website

OBJECTIVE

I am a fourth-year college student pursuing a degree in Information Technology. I am seeking an On-the-Job Training opportunity to gain real-world experience within the field of Information Technology, and to further enhance my technical and interpersonal skills while making a valuable contribution to your organization and actively participating in projects that are aligned with the IT field.
